

Domestic Water Softeners

Protect Your Home From Limescale

Rethinking Water

What is Hard Water?

Hard water contains high levels of natural minerals absorbed from rock and soil. Although water is naturally soft when it falls from the sky, it gains its hardness after making contact with the ground. It's very common in Ireland's drinking supply. Limescale is formed when you heat hard water. Hard water can cause damage to electrical appliances and pipework, dull hair and skin as well as creating limescale staining in kitchens and bathrooms.

What is Softened Water?

Softened water is the result of water softening; a process that involves the removal of calcium, magnesium, and other metals found in hard water.

Soft water extends the lifetime of plumbing and appliances; it does this by reducing limescale that builds-up in pipes and fittings over time. The resulting soft water also lathers better and requires less soap when washing up.

Why Choose eSoft Salt Tablets?

Water softener salt is needed to clean and recharge the softener's resin beads, allowing them to continue removing hardness minerals from water effectively and prevent limescale buildup in your plumbing and appliances.

By investing in quality softening salt, your water softening system will work more efficiently and last longer.

eSoft Salt Tablets are supplied in the form of tablets conveniently packaged in 25 kg bags.

What is eSoft?

eSoft, developed by EPS Group, is the premium range of water softeners meticulously designed for the discerning homeowner. Our commitment to excellence is rooted in the valuable feedback from our customers and end users, inspiring us to create a water softener that epitomises reliability and durability.

Exclusively utilising top-tier components, the eSoft range undergoes production and rigorous testing at our state-of-the-art assembly facility in Mallow, Co. Cork. Our highly skilled assembly crew ensures that each eSoft unit is a testament to quality, featuring a certified valve control, NSF-certified ion exchange resin, and a cabinet sourced locally for a touch of authenticity.

Contact us today and we will put you in touch with your local retailer or nearest agent for the eSoft range of water softeners.

eSoft PRO

Hard water poses a widespread challenge for homeowners in Ireland, characterised by elevated levels of dissolved calcium and magnesium that foster limescale accumulation within water-related appliances like electric kettles, washing machines, dishwashers, showers and boilers.

The repercussions of limescale-related issues extend beyond mere inconvenience, impacting the aesthetic value of your property by tarnishing the appearance of your bathroom and kitchen. It also has a direct effect on your energy bills and could potentially result in the premature deterioration of your appliances.

To cater to a diverse range of requirements, the eSoft PRO water softener is available in a variety of sizes, ensuring compatibility for everything from a single tap to a spacious family home. Our dedicated team of water treatment specialists is at your service to guide you in selecting the ideal softener size that perfectly suits your needs.
